

Storefront Product Deck

Launch your own on-demand ecommerce shop
and mobile app with Fleetbase

Fleetbase

We provide logistics infrastructure to enhance operational flows and system development processes.

fleetbase.io

FleetOps - Multipurpose last mile logistics operation system and routing engine

Developers Console - Build, test & debug logistics applications & integrations

Storefront - Ecommerce back end store and customer order portal

Consulting - Consulting services for logistics, supply chain and shipping companies

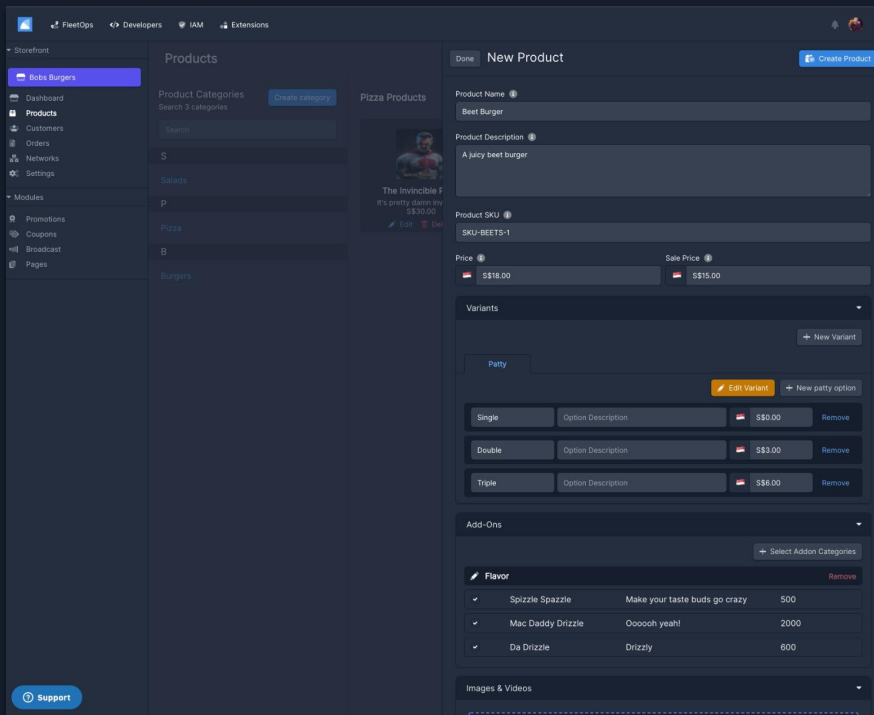

Challenges In Ecommerce & Logistics

- Long build out times for ecommerce web and mobile apps
- High development cost for customer ordering apps
- Difficult to build out real time customer tracking and management features
- Lack of open source ecommerce customer order apps
- Lack of integration between ecommerce apps and delivery systems
- Inability to create ecommerce networks between multiple vendors and businesses

Fleetbase Storefront

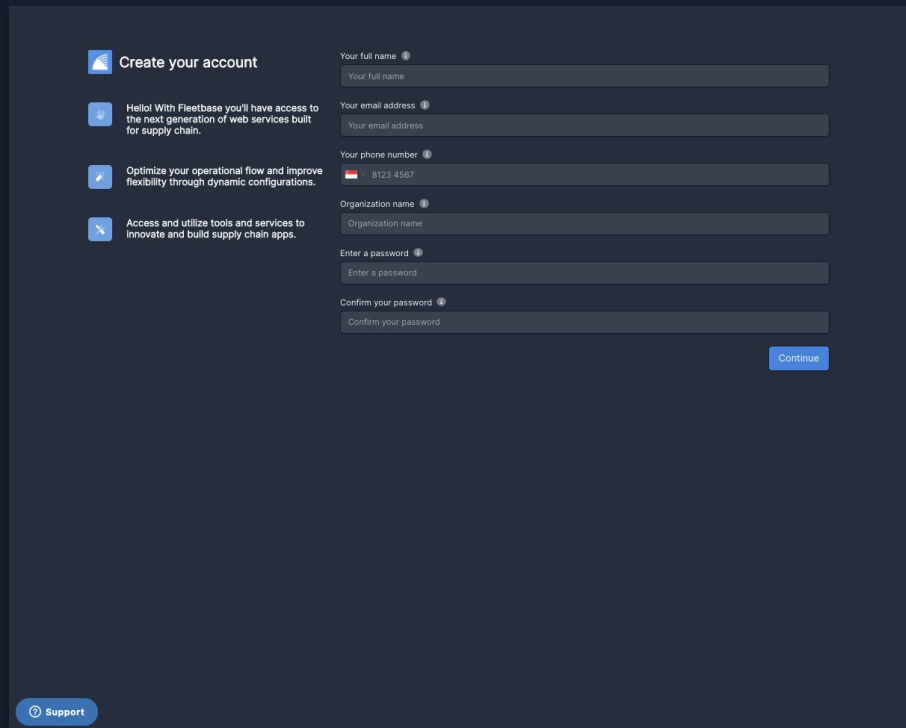

Build & manage your ecommerce store and customer order portal using Fleetbase Storefront.

- Ecommerce API layer for Fleetbase
- Open source consumer app
- Ability to use e-commerce layer API
- Create a marketplace of storefronts with "networks"
- Last mile integration by default

How does it work? Step 1:

Sign up to
Fleetbase console
and navigate to the
Storefront
dashboard

The screenshot shows the 'Create your account' form in the Fleetbase console. The form is titled 'Create your account' and includes a 'Support' link at the bottom left. The form fields are as follows:

- Your full name**: A text input field with a placeholder 'Your full name'.
- Your email address**: A text input field with a placeholder 'Your email address'.
- Your phone number**: A text input field with a placeholder '8123 4567' and a small flag icon.
- Organization name**: A text input field with a placeholder 'Organization name'.
- Enter a password**: A text input field with a placeholder 'Enter a password'.
- Confirm your password**: A text input field with a placeholder 'Confirm your password'.

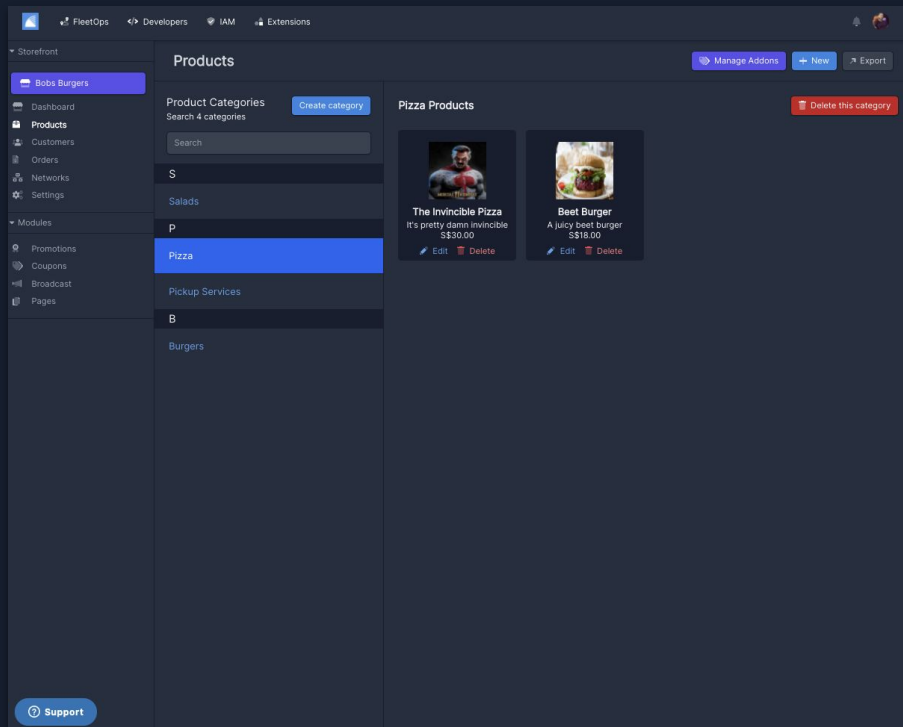

A 'Continue' button is located at the bottom right of the form.

Fleetbase

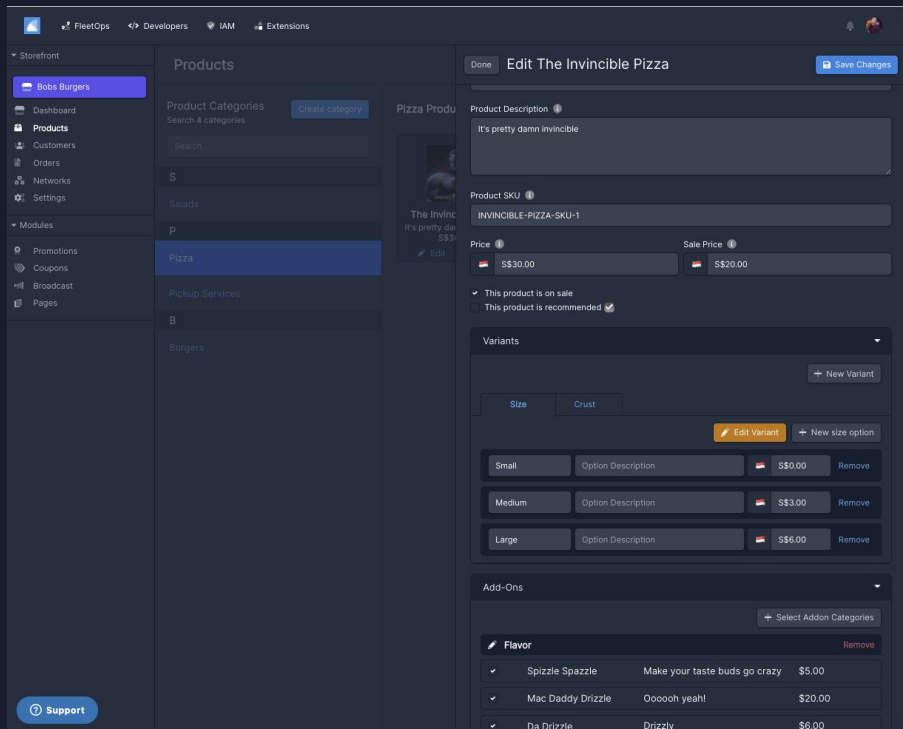

How does it work? Step 2:

Create your Storefront configuration adding your products or services for your customer order web & mobile apps

How does it work? Step 3:

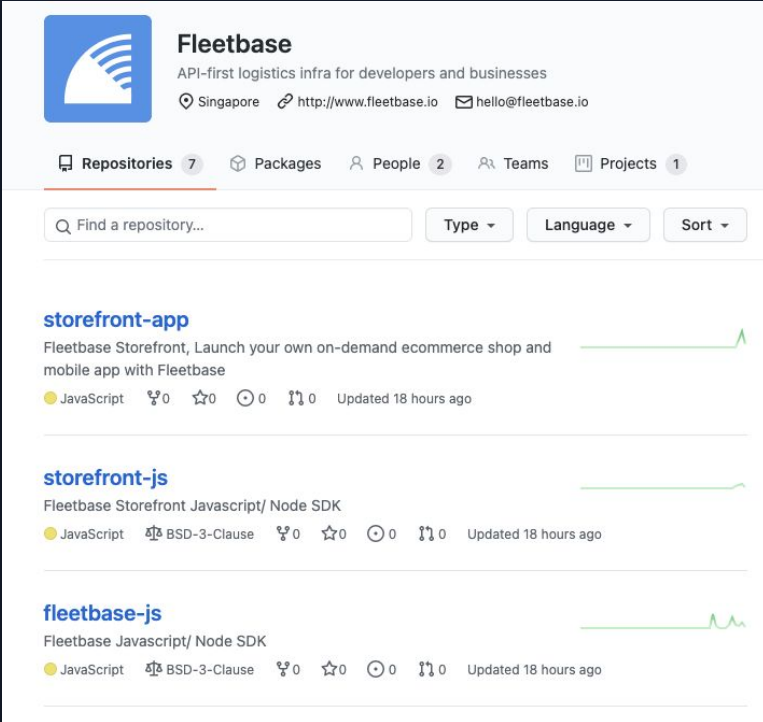

Define your delivery services rates for each product or service so that this can be automatically applied when delivery job is created.

Fleetbase

How does it work? Step 4:

Once completed,
navigate to the
Fleetbase Github and
follow the steps to
clone the Storefront
app and plug your api
keys to start.

Fleetbase

How does it work? Step 5:

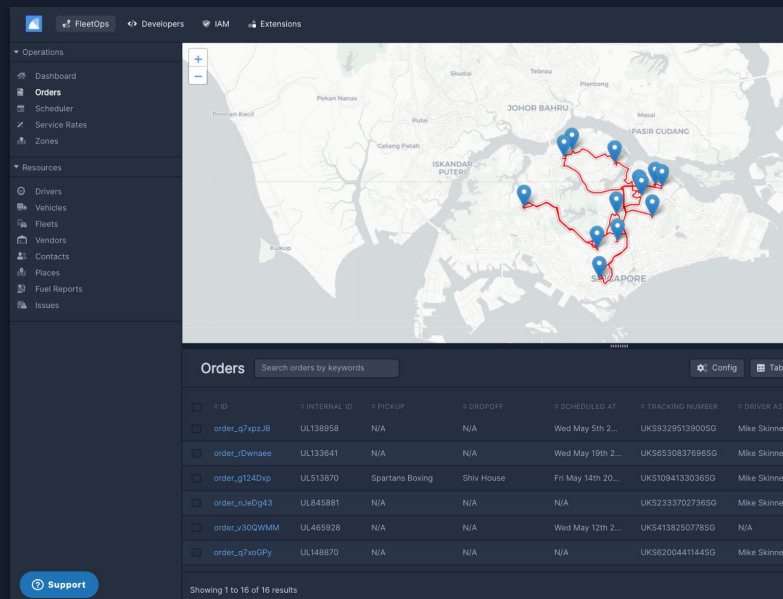

Brand, configure and
add additional
changes to the mobile
app before publishing.
Your customers can
now submit orders and
service requests.

Integration to FleetOps

As standard, your web and mobile apps will be integrated into FleetOps. This means when an order is generated by your customer this will automatically generate an order in FleetOps. Manage your delivery operations in real time.

- Custom order flows
- Custom Activity Updates
- Track & Trace
- Scheduling
- Resource Management
- Route Optimization
- Powerful API
- Service Rates
- Custom Zoning

The screenshot displays the FleetOps web interface. On the left is a sidebar menu with sections for Operations (Dashboard, Orders, Scheduler, Service Rates, Zones) and Resources (Drivers, Vehicles, Fleets, Vendors, Contacts, Places, Fuel Reports, Issues). The main area features a map of Singapore with a red route connecting several blue location pins. Below the map is an 'Orders' table with a search bar and a 'Config' button. The table lists orders with columns for ID, Internal ID, Pickup, Dropoff, Scheduled At, Tracking Number, and Driver. At the bottom, it shows 'Showing 1 to 16 of 16 results'.

ID	INTERNAL ID	PICKUP	DROPOFF	SCHEDULED AT	TRACKING NUMBER	DRIVER AS
